

Universal Bench Mounted Frame provides a alternative to wall mounting, particularly since many new buildings are predominantly glass, with very flimsy dividing walls.

The frame is designed to accommodate two items of apparatus, allowing adequate space for students to work on each piece of equipment simultaneously. However it is possible to mount three pieces, in the case of the simple transmission system.

Dimensions	700 x 1200 x 50mm.
Nett Weight	28 kg.

Note: New catalogue available soon

* Specifications subject to change without previous notice, due to continuous improvements of the product.
