

SunBender DIY Solar Battery Charger AA/AAA (PSL18)

General Description

Our new Sun bender do-it-yourself solar kit is perfect for beginners. This kit comes pre-wired so there is no soldering required. The solar battery charger will charge two or four AA or two or four AAA rechargeable batteries. It includes two 3V 200mA solar panels, two AA holders and two AAA holders for two batteries each. The solar charge will charge 2 batteries at 400mA charge rate and 4 batteries at 200mA rate. Two 2000mA-hr AA's would take about 5 hours of full sun to charge.

The kit includes a digital meter making it easy to judge state of charge. You can build the solar battery charger in a housing of your choosing. You can use a wooden box or a simple plastic container from a supermarket. The kit includes complete instructions.

It is great for Physics, Environmental Science, and Renewable Energies classes as a hands-on lab and ideal for students from high school to even college.
