

Sky-Z Limitless Wind & Solar Education Lab (PWH8)

General Description

PWH8 is a hybrid system for teaching and learning about the renewable energies sector. This system consists of a wind turbine (PWH3), a 9W solar panel and the PC 101 unit but with 12 experiments instead of 8.

PWH3 is the most complete Educational Wind Turbine on the Market. 3 different size blades, pitch built into the Hub, completely hands on and with the ability to customize your do-it-yourself generator using pre-wound coils and rare earth magnets. Test up to 6 blades at once with built in pitch angles. Each size blade comes with 6 blades. (6", 8", and 10" blades included). It also includes a manual for building your Wind Turbine.

The 9W solar panel combined with the PC101 module gives you endless possibilities of experimentation with the sun and the solar power in general. With PWH8 you can study wind energy, solar energy or both and even an introduction to electric circuits. Have fun and learn with the solar & wind education lab.
